Apple News

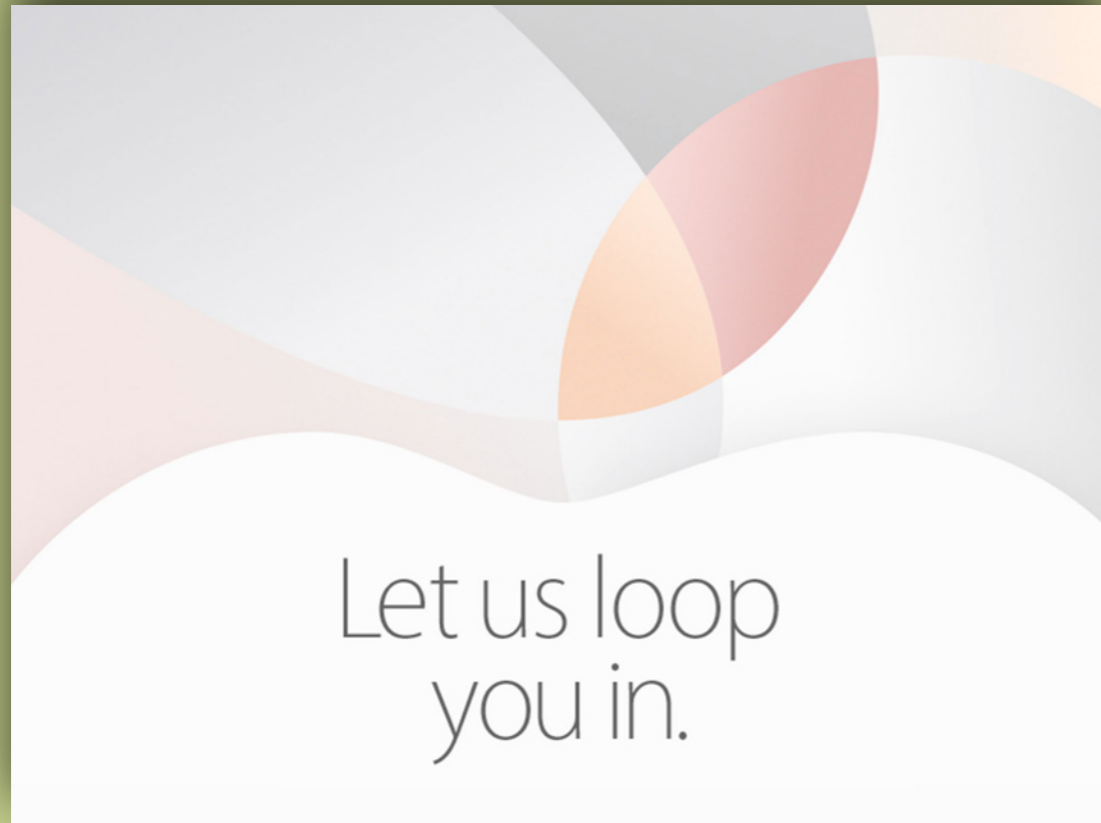

- Apple March Event Summary (Alan)
 - 4” iPhone
 - Smaller iPad pro
 - OS Updates - iOS 9.3; tvOS 9.2; OS X 10.11.4; watchOS 2.2
 - “more than 1 billion Apple devices are in use around the globe!”
- Apple Fights FBI - Update
 - FBI withdrew case against Apple as they found an alternate method of accessing the iPhone - only useful on older phones;
 - Seems that there was nothing there and case was being used as a precedent;

Presentations (Alan)

Apple Keynote 21 March

Using Siri

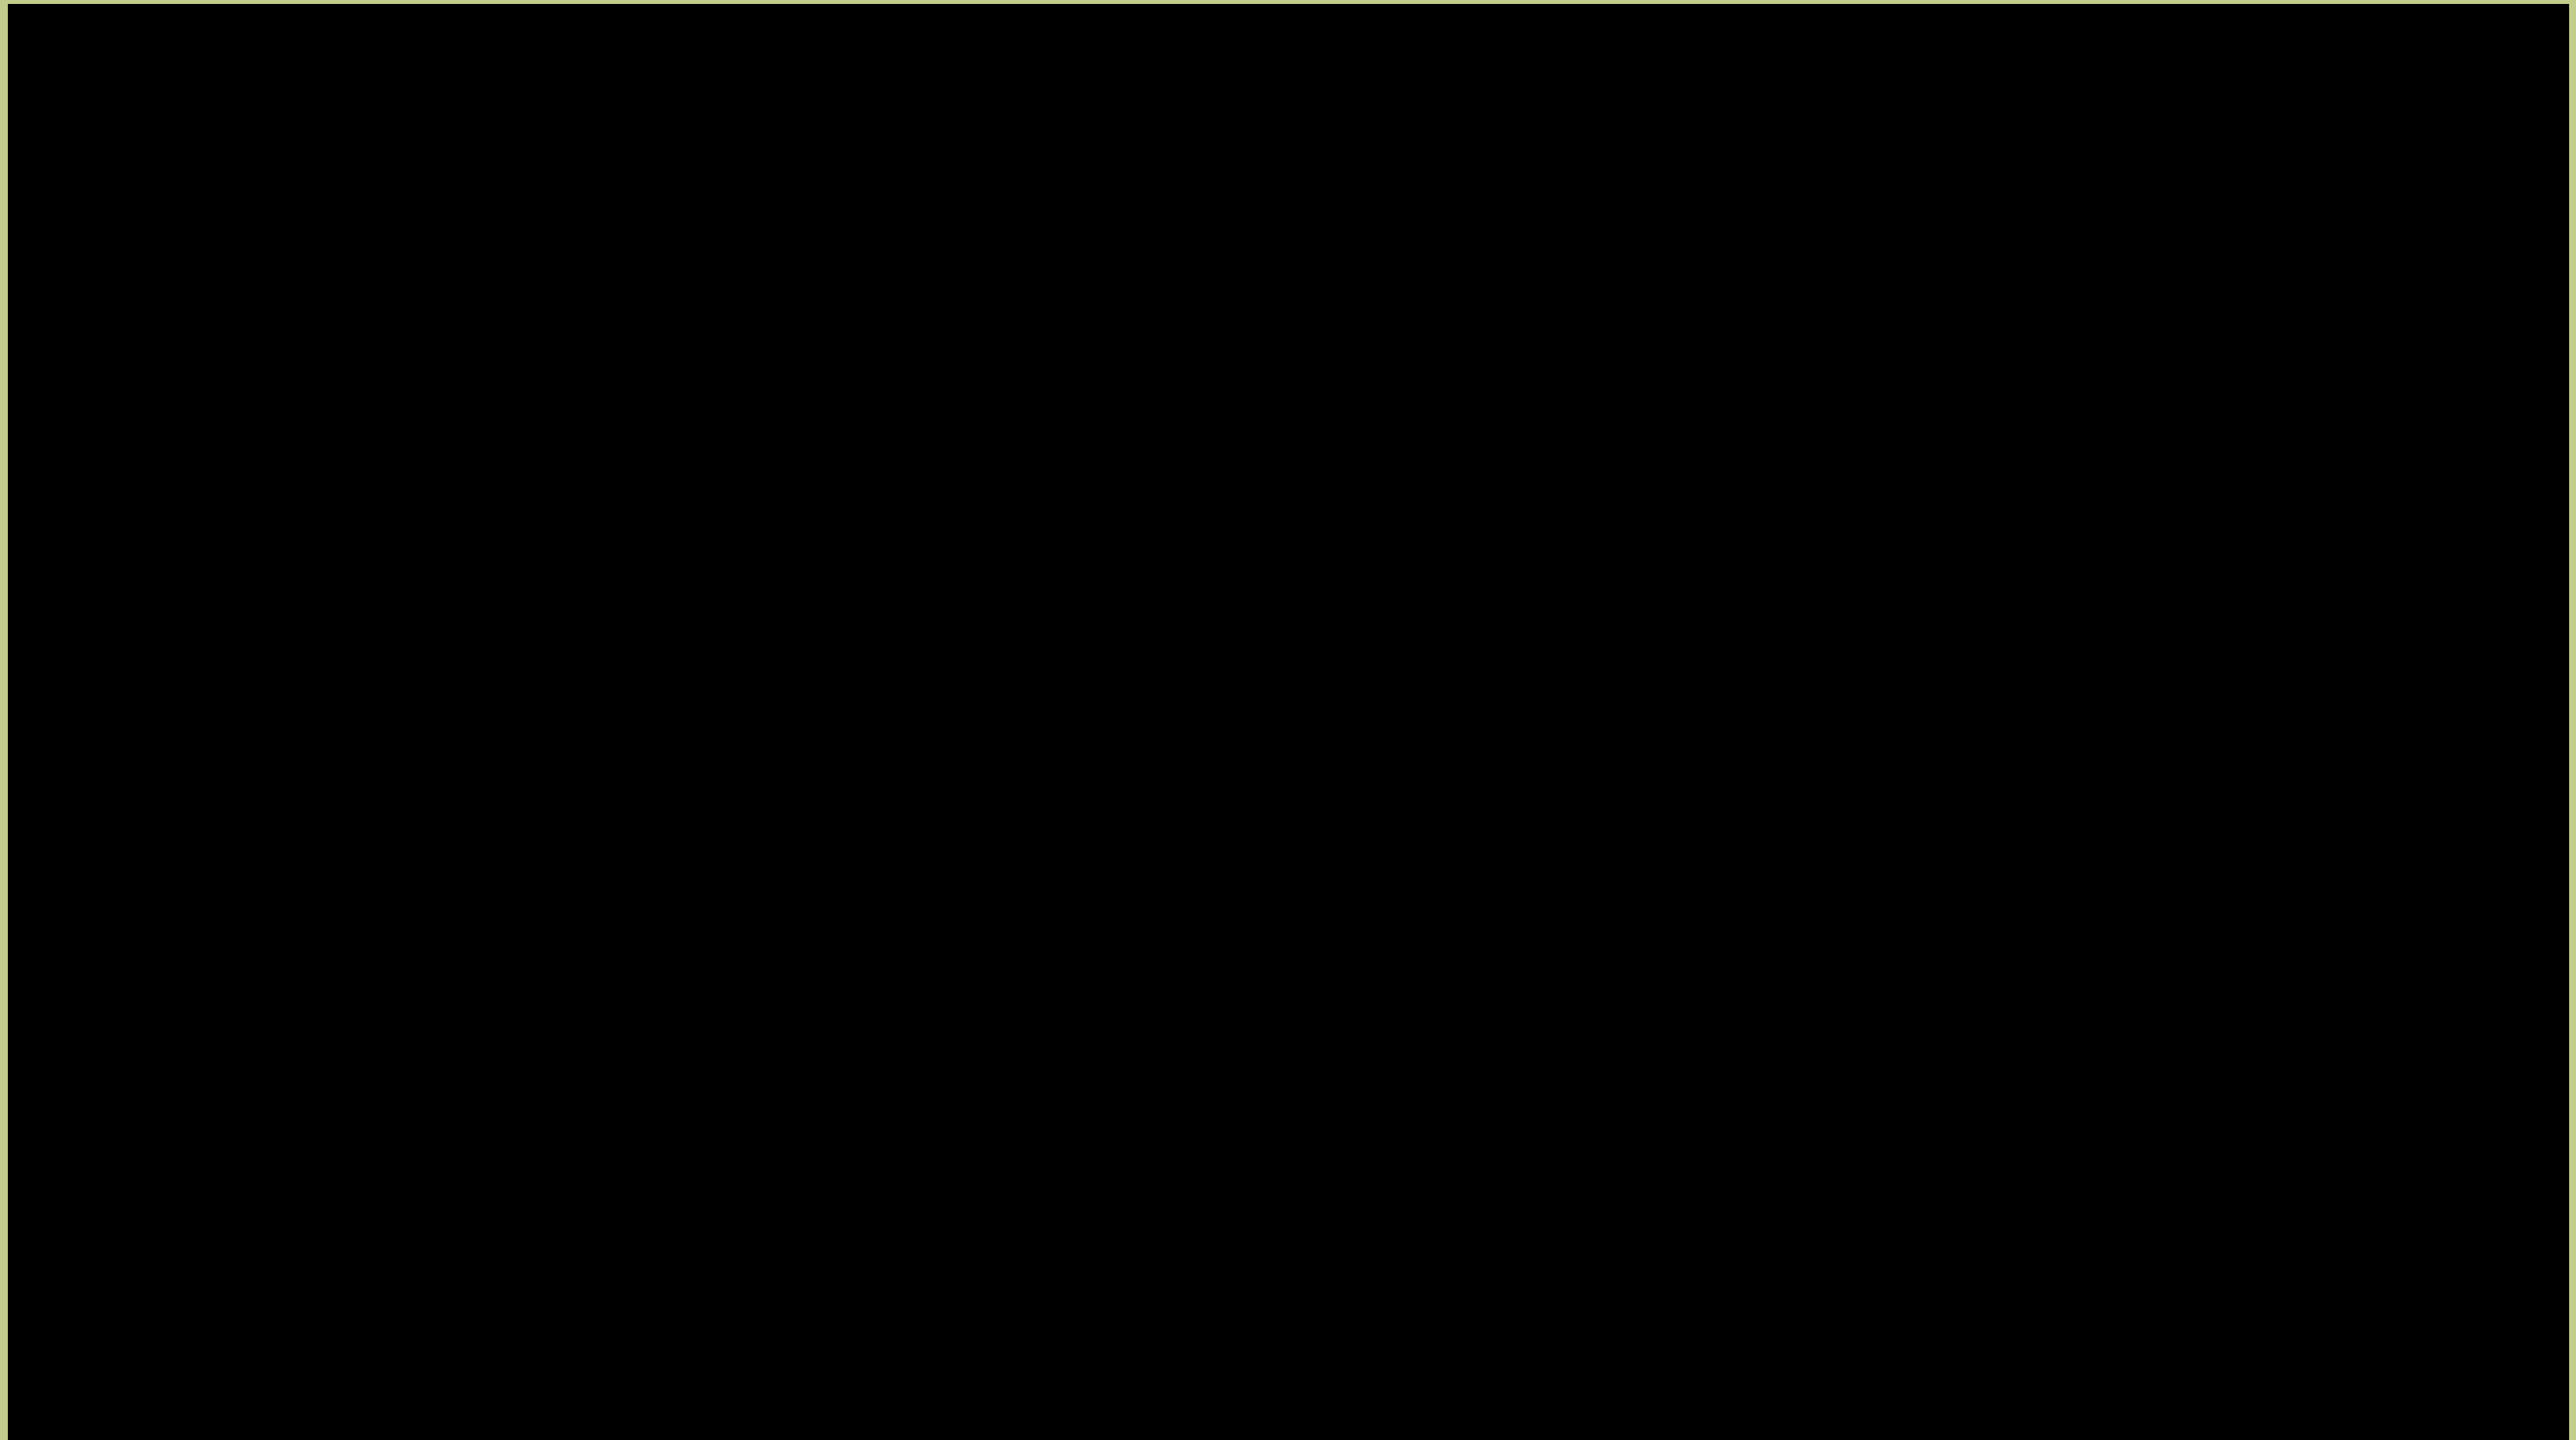

Apple Keynote - 21 March 2016

- Recycling and Sustainability
 - 93% of data centres around the world now powered by renewable energy
 - LIAM - to disassemble phones for recycling
- iOS 9.3
 - Nightshift Mode
 - Password protect and Touch Id for Notes
 - Duplicate Live Photo as a standard photo when exporting from Photo app
- iPhone SE
- iPad Pro 9.7"
- CareKit

LIAM ... *Recycling and Sustainability*

<https://www.youtube.com/watch?v=AYshVbcEmUc>

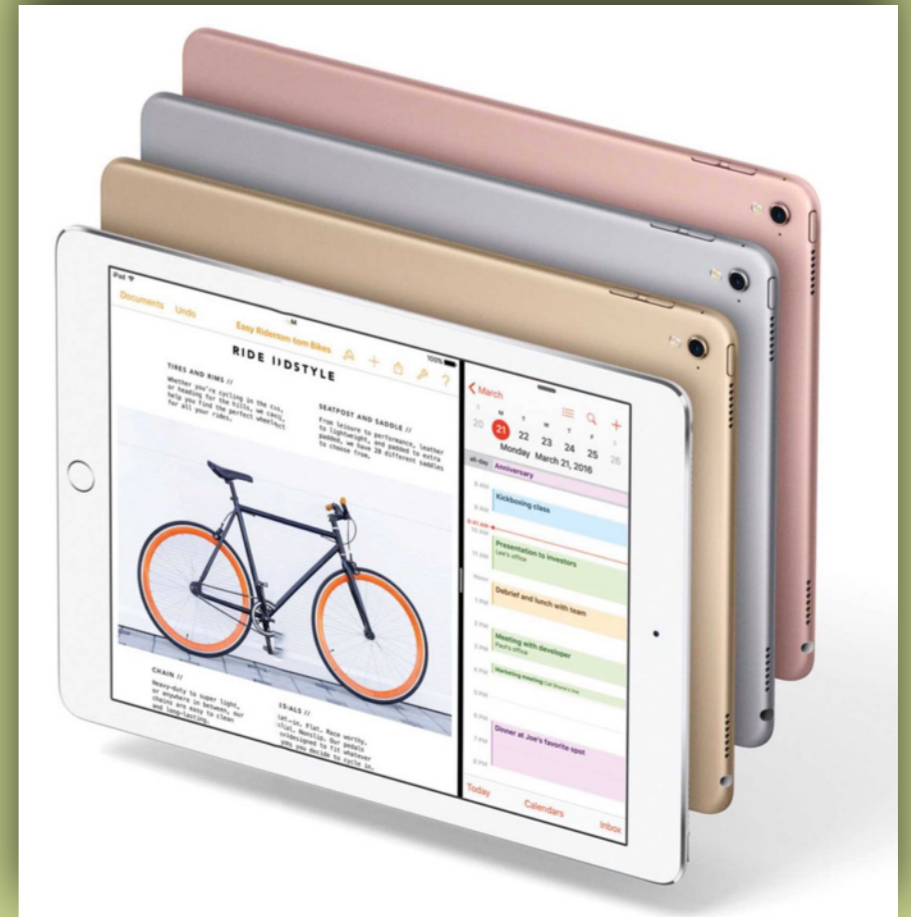

iPhone SE

- 4 inch screen
- Same design as iPhone 5s but with matt chamfered edges
- Similar internals to iPhone 6s
- 12MP iSight camera with 4K video recording
- Has an NFC chip to use Apple Pay
- No 3D Touch

iPad Pro 9.7"

- Same size, shape and weight as iPad Air 2 but similar internals to 12.9" iPad Pro (only 2GB memory)
- 12MP iSight camera with 4K video
- Up to 256GB storage (plus 32GB and 128GB)
- True Tone display
- Supports Apple Pencil

CareKit

- Framework to develop apps for the support and care of people with specific medical conditions
- Eg. Parkinsons Disease - monitor effectiveness of medication
- Great potential when linked to future Apple Watch monitoring

Siri

- ◆ **Speech Interpretation and Recognition Interface**
- ◆ Apple's personal assistant for iOS
- ◆ Uses natural language interface to adapt to you as it is used more
- ◆ Originally for iPhone but now available on iPads, Apple Watch and Apple TV. Rumoured to be soon released for Macs!

How Does Siri Work

- Device captures voice, cleans out background then sends digital audio file over internet to Apple servers
- Apple servers interpret the request and returns back the results or best way to perform actions
- Device then performs action (play a song) or presents results from Apple servers
- By not putting everything on the device, Apple can improve and update services without impacting you

Why I'm Qualified to Talk about Siri

- My wife is named “Siiri” - Apple got the spelling wrong
- Apple Siri was released on 14 October 2011 (Wikipedia) - my wife's 50th birthday!
- Artificial vs Real World
- So what are the differences...

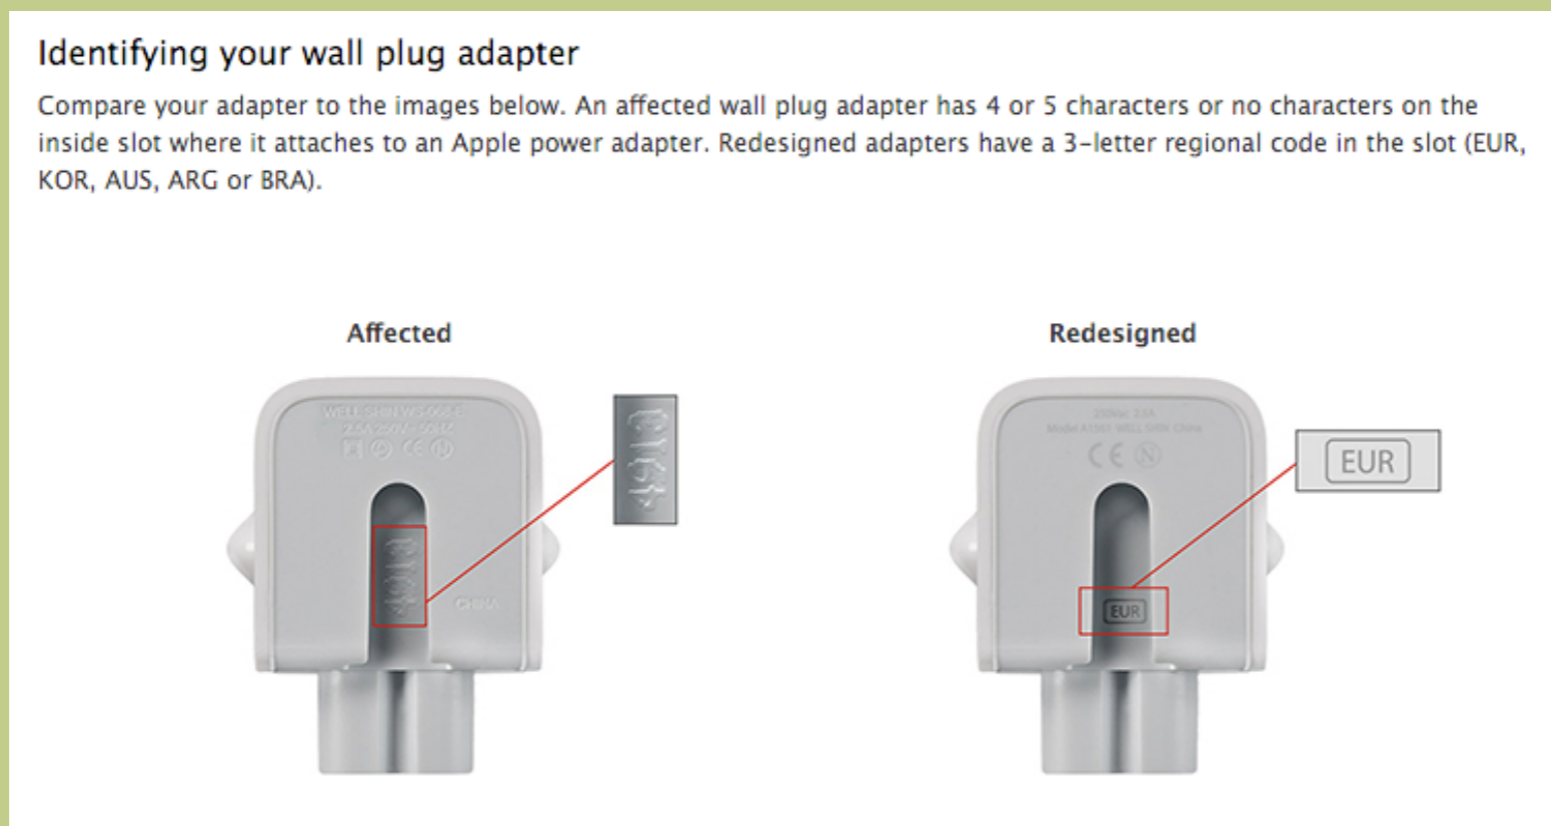

Siri vs Siiri

Characteristic	Apple Siri	My Siiri
Listens to what I'm saying?	Always	Depends...
Obeys orders?	Always when she understands the request	Too scared to try
Do they talk back?	Can be cheeky in some replies	I refuse to answer this
Costs?	Free	Who's counting...
Best Features	Ease of use	Too many to list...
